DETAILED ACTION

1. This office action is in response to application 10/731,566 filed on 12/08/2003.

Claims 1-34 remain pending in the application.

Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-14 and 21-30, drawn to a design method for transforming sequential logic designs into equivalent combinational logic comprising simulating each stage, saving the simulation values and performing a plurality of backward logic traces, classified in Class 716, subclass 3.

II. Claims 15-20 and 31-34, drawn to a back tracking method for transforming sequential logic designs into equivalent combinational logic comprising determining whether a time T is negative with specific conditions as recited in the claims, classified in Class 716, subclass 3.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations. (M.P.E.P. § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the Invention I does not require all steps as recited in claims 15 and 31. The subcombination has separate utility such as the invention II lacks of performing simulation of each stage of a clocking sequence

Art Unit: 2825

and saving the simulation values as recited in claims 1 and 21.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and different search, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. William Alford at 714-557-3800 on 8/12/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that the required for response to this requirement is **30 days, not one month.**
